Tetra Pak

Tetra Pak Carton Ambient S.p.A.

General information

Manufacturer

This machine is produced by:
Tetra Pak Carton Ambient S.p.A.
Via Delfini 1
41100 Modena /Italy

Document producer

This document has been produced by:
Tetra Pak Carton Ambient S.p.A.
Technical Publications
Via Delfini 1
41100 Modena /Italy

Number of pages

This document contains totally **40 pages**, including the first **8** introduction pages.

General information

Service

When ordering spare parts for your machine, contact the nearest Tetra Pak service station.

Machine identification

This machine plate is an example of the type of machine plate, attached to the machine frame. The plate carries data needed when contacting Tetra Pak concerning this particular machine **(see Figure 1)**.

Purpose of the Spare Parts Catalogue.

The purpose of the Spare Parts Catalogue (SPC) is to provide the technicians and contact personnel with information on how to find and order spare parts for maintenance and service of the machine.
For instructions of how to replace parts and adjust machine setup, see the Maintenance Manual (MM).

Delivered documentation

The technical documentation delivered with this machine is stated in the Machine Specification.
Note! If any of these documents is missing, it must be reported in the document **Start Up Machine Quality Report**. For more information, see chapter 8 Preparation for Commissioning in the Installation Manual.
It is important that you keep these documents for the life of the equipment, and pass the documents on to any subsequent holder or user of the equipment.

Design modification

The content of this document is in accordance with the design and construction of the machine at the time it was delivered from the Tetra Pak machine production facility.

Further copies

Additional copies can be ordered from the nearest Tetra Pak service station. When ordering technical publications, always quote the document number printed on the front cover of the document concerned.

Tetra Pak Part numbering system

The third and forth digits in the sub-number, specify one unique group which can be ordered. If the forth digit is replaced by a "0", the number combination only points to a bill-of-material document.
The first and second digits in the sub-number, specify the development step (model) of the machine or group. **(see fig. 3)**
Main number of machine /group /article, depending on level.
Prefix, giving information about level, eg.
A = Machine
B = Main section (*)
C = Groups and subgroups
*) Customized distribution machines are registered as B-level as well.

How to find the correct Spare Part Number

A. Check that the data on your machine sign, and /or machine specification, corresponds with the catalogue.**(see fig.1)**
1) Main groups of the machine

B. The second catalogue sheet contains a table of content for the main groups, included in the catalogue. The information regarding machine and main group status MUST correspond with your machine specification.
Locate and choose the main groups page number (1), in which you want to search for spare parts.
(see fig. 2)
2) Main group
3) Machine type

C. Search in the main group illustration, the item number, which may hold your wanted spare part. Go to the text page below and find the page number for the actual group. **(see fig. 4)**
4) Internal information, such as latest Engineering Change, Bill-of-Material included in the catalogue page and the Assembly Drawing required
5) Used-In reference to next higher level in the machine structure
6) Assembly drawing number including the archive file extension
7) Continuous page numbering through the document
8) Pos number corresponding to illustration
9) Group or article number. Groups having own pages are indicated by a Page reference. Some Part Numbers may contain sub parts, these are listed in *italic font* after their parent item.
10) Group or article description..
11) Machine type including development status
12) Group description
13) Group number (bill-of-material) including development status
14) Document number

D. Continue to the found page number, and search in the illustration for your spare part. Go to the text row for the found item number, and read the part number. Take eventual variant headings in consideration; if you are unsure, read your machine specification. **(see fig. 5)**
15) Variant heading, eg volume, left /right etc.
16) Heading for common parts

17a) SP = Code for articles, which are included into various spare part kits. (from R3 source)
A = Critical Spare Part
B = Non - Critical Spares Part
C = Don't stop function, can bypassed
D = Seldom break, long time production

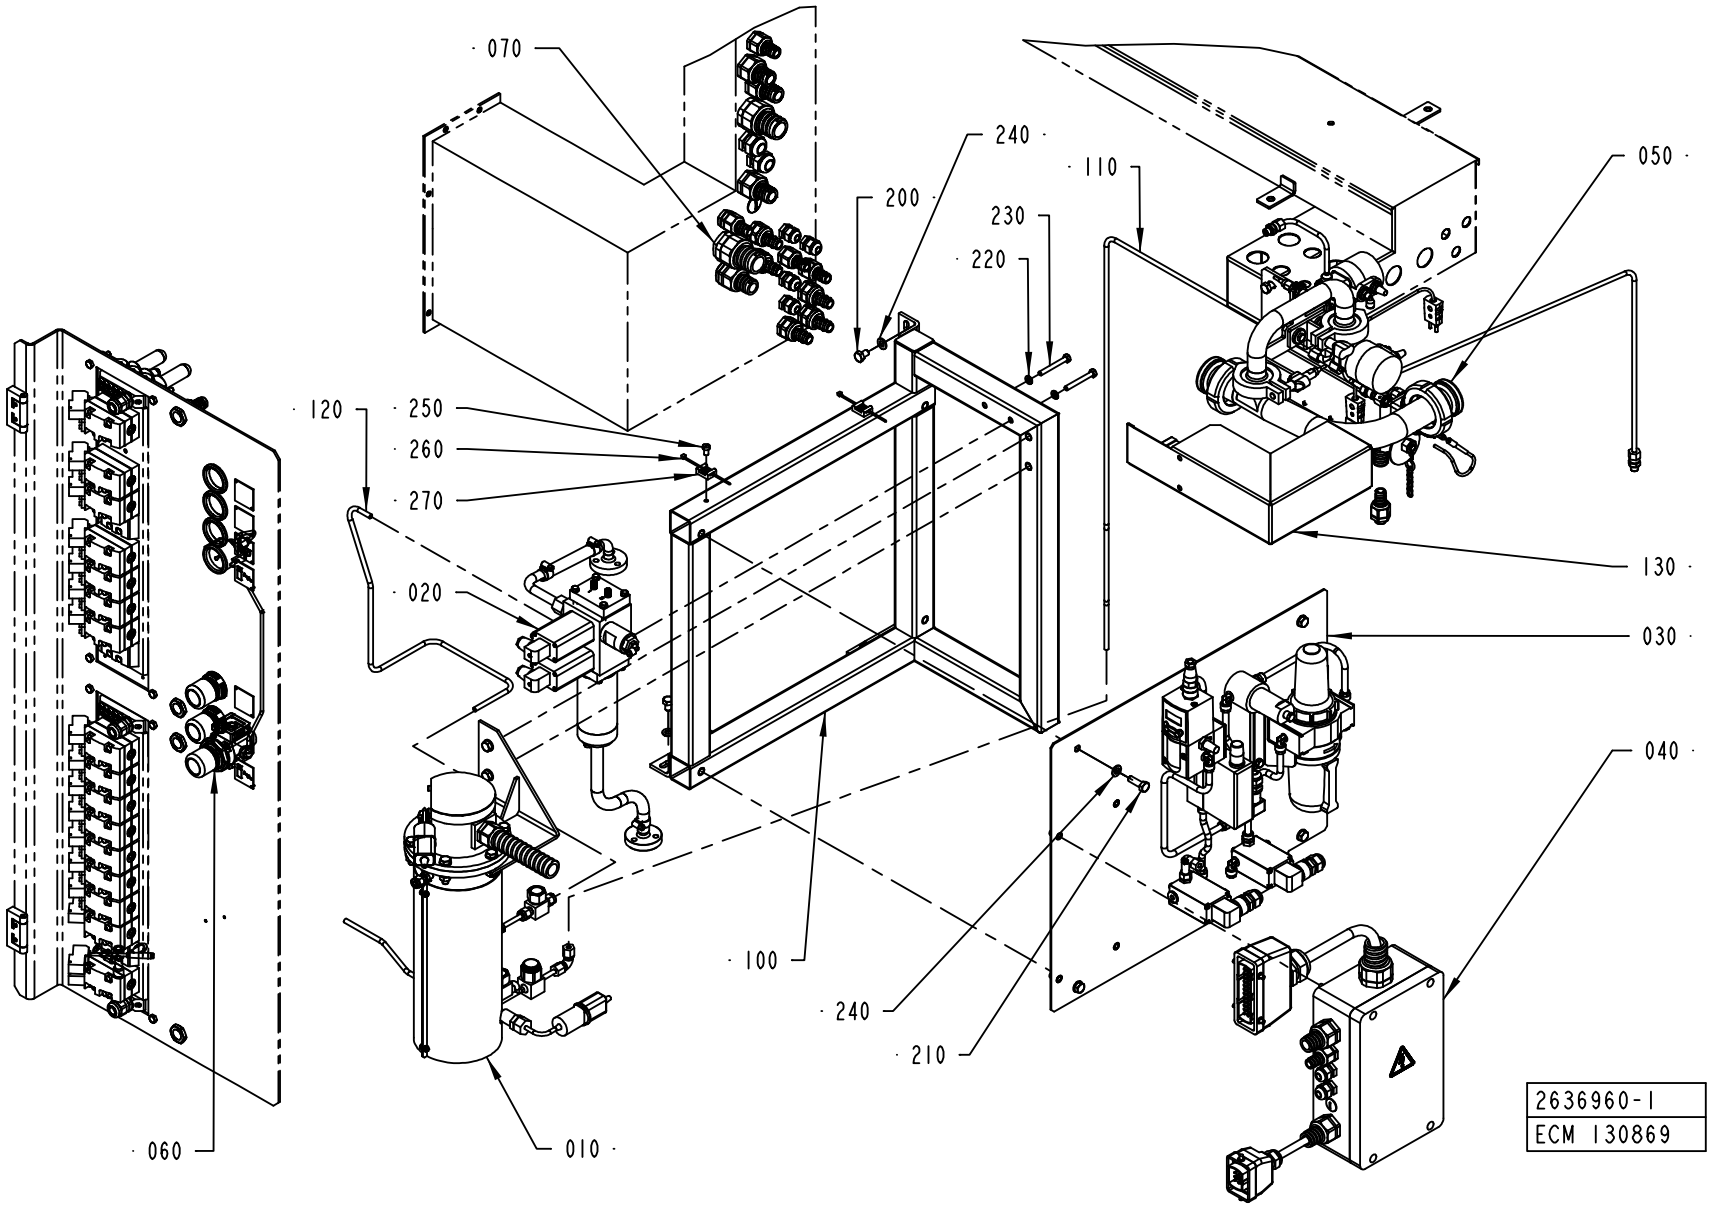

17b) SP = Code for articles, which are included into various spare part kits. (from AS400 source)
U = Starting-up kit supplied on machine delivery
P = Production kit to be held at production site workshop
S = Service kit to be held at service stations store
C = Central depot kit to be available at the central store

18) UN = Short code for measure units, eg mm, kg etc.
19) Qty = Number of items needed in the complete assembly.

E. Some Groups in the Catalogue may span over multiple pages, due to long text pages and/ or need of multiple drawings. When this occurs, a note (*This list covers pages from x-2 to x-5*) is written in the text page header.
20) List length information

F. When the list has more then one variant and each variant has its own assembly drawing dedicated, a page reference to the right drawing is given by the note *(See drawing on page: x-2)* after the variant heading.
21) Drawing reference information
