Tetra Pak

Tetra Brik Packaging Systems AB

General information

Manufacturer

This machine is produced by:
Tetra Brik Packaging Systems AB
Ruben Rausings gata
221 86 Lund /Sweden

Document producer

This document has been produced by:
Tetra Brik Packaging Systems AB
Technical Publications
Ruben Rausings gata
221 86 Lund /Sweden

Number of pages

This document contains totally **186 pages,** including the first **14** introduction pages.

General information

Service

When ordering spare parts for your machine, contact the nearest Tetra Pak service station.

Machine identification

This machine plate is an example of the type of machine plate, attached to the machine frame. The plate carries data needed when contacting Tetra Pak concerning this particular machine.
The location of the different machine plates is shown on the page “Location of machine number plates”, **see page 2**

Purpose of the Spare Parts Catalogue.

The purpose of the Spare Parts Catalogue (SPC) is to provide the technicians and contact personnel with information on how to find and order spare parts for maintenance and service of the machine.
For instructions of how to replace parts and adjust machine setup, see the Maintenance Manual (MM).

Delivered documentation

The technical documentation delivered with this machine is stated in the Machine Specification.
Note! If any of these documents is missing, it must be reported in the document **Start Up Machine Quality Report.** For more information, see chapter 8 Preparation for Commissioning in the Installation Manual.
It is important that you keep these documents for the life of the equipment, and pass the documents on to any subsequent holder or user of the equipment.

Design modification

The content of this document is in accordance with the design and construction of the machine at the time it was delivered from the Tetra Pak machine production facility.

Copyright © 1997 Tetra Brik Packaging Systems AB

All rights reserved. No parts of this document may be reproduced or copied in any forms or by any means, without written permission from Tetra Brik Packaging Systems AB.

Further copies

Additional copies can be ordered from the nearest Tetra Pak service station. When ordering technical publications, always quote the document number printed on the front cover of the document concerned.

Tetra Pak Part numbering system

The third and forth digits in the subnumber, specify one unique group which can be ordered. If the forth digit is replaced by a “V”, the number combination only points to a bill-of-material document.
The first and second digits in the sub-number, specify the development step (model) of the machine or group. **(see fig. 3)**
Main number of machine /group /article, depending on level.
Prefix, giving information about level, eg.
A = Machine
B = Main section (*)
C = Groups and subgroups
***)** Customized distribution machines are registered as B-level as well.

How to find the correct Spare Part Number

A. Check that the data on your machine sign, and /or machine specification, corresponds with the catalogue. **(see fig.1)**

1) Main groups of the machine

B. The second catalogue sheet contains a table of content for the main groups, included in the catalogue. The information regarding machine and main group status MUST correspond with your machine specification.
Locate and choose the main groups page number (1), in which you want to search for spare parts.
(see fig. 2)

2) Main group
3) Machine type

C. Search in the main group illustration, the item number, which may hold your wanted spare part. Go to the text page below and find the page number for the actual group. **(see fig. 4)**

4) Internal information, such as latest Engineering Change, bill-of-material included in the catalogue page.
5) Used-In reference to next higher level in the machine structure
6) Assembly drawing number
7) Continuous page numbering through the document
8) Pos number corresponding to illustration
9) Group or article number.
10) Group or article description. The letter “B” in front of some article numbers indicates that this article contains other parts, shown in an additional page at the end the section. Letter “A” indicatates a subgroup number with an own page directly after the actual page.
11) Machine type including development staus
12) Group description
13) Group number (bill-of-material) including development status
14) Document number

D. Continue to the found page number, and search in the illustration for your spare part. Go to the text row for the found item number, and read the part number. Take eventual variant headings in consideration; if you are unsure, read your machine specification. **(see fig. 5)**

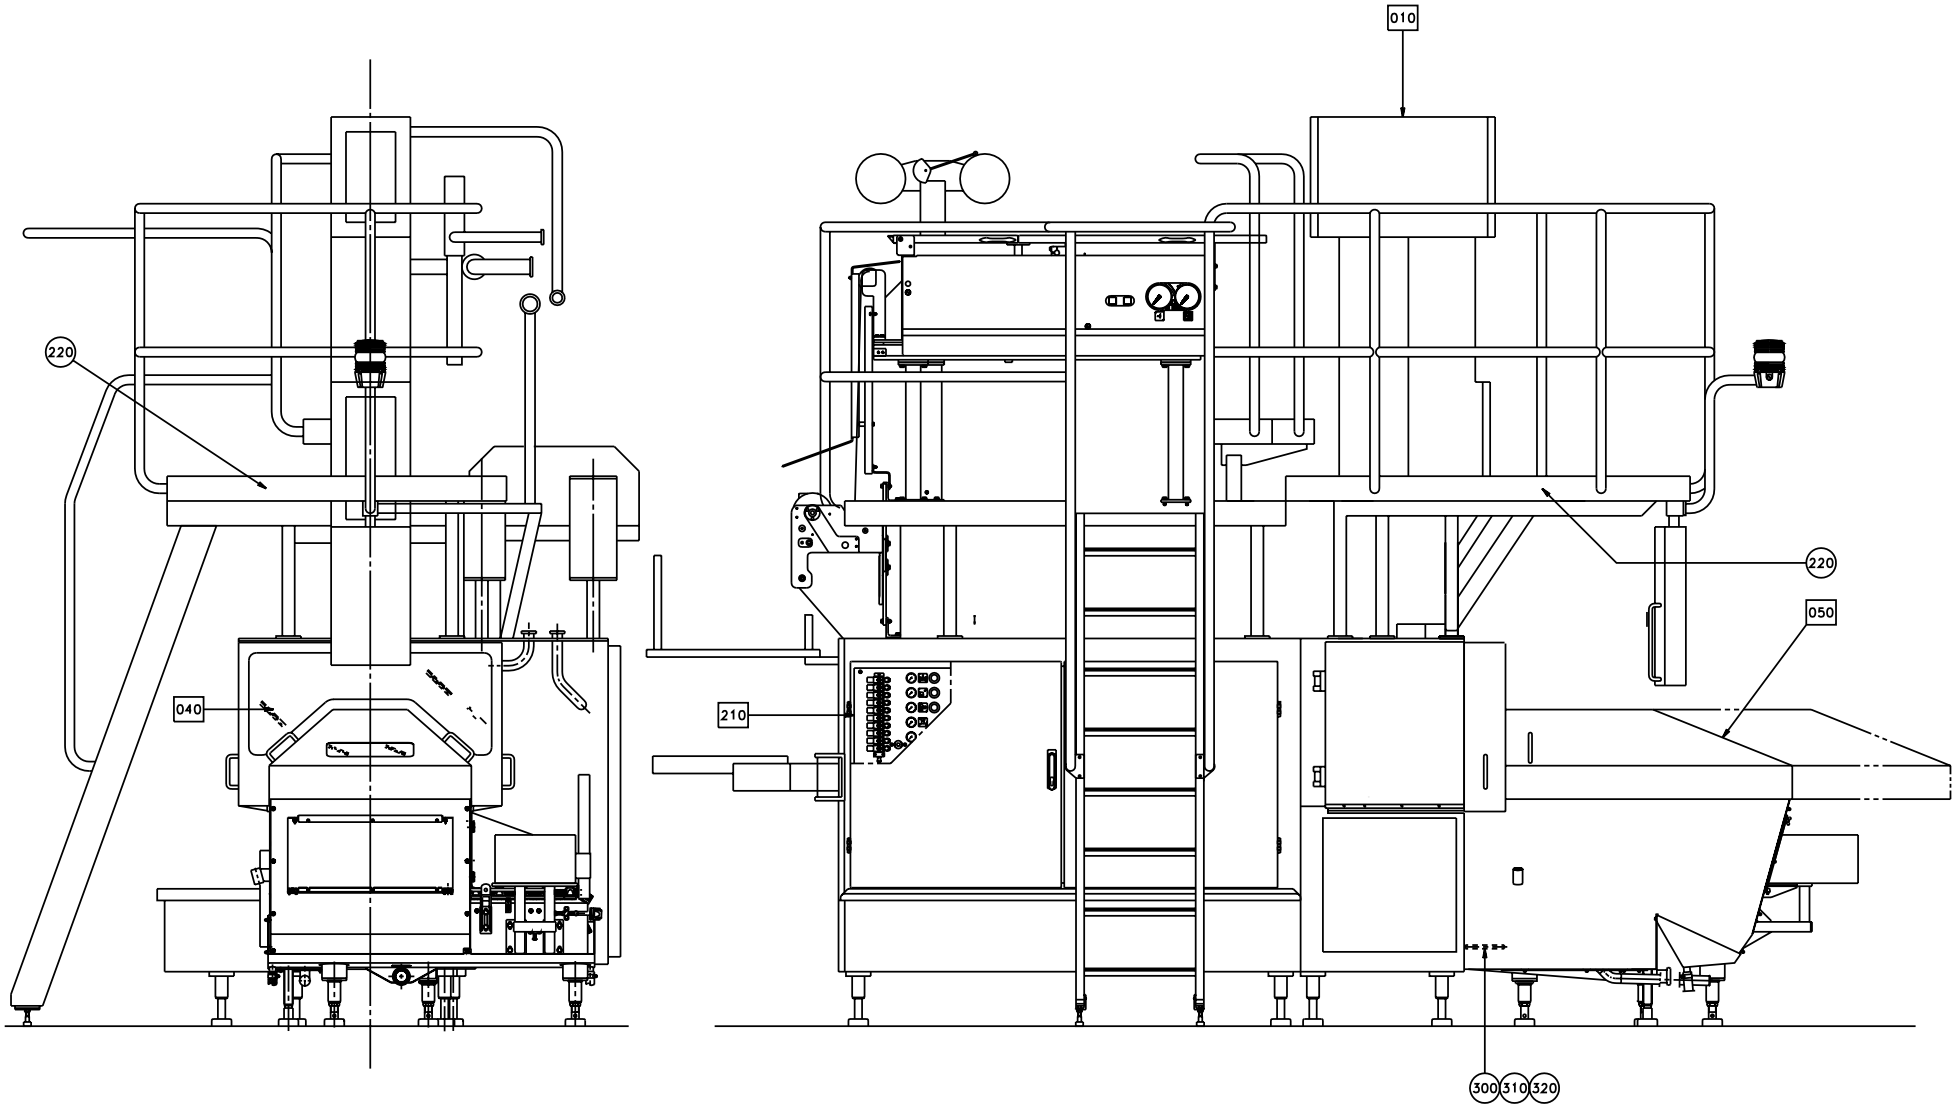

15) Variant heading, eg volume, left /right etc.
16) Heading for common parts
17) SP = Code for articles, which are included into various spare part kits.

A = Stop function, no rep/available/bypassed	I = 1000 operating hours
B = Stop function, rep/available/bypassed	J = 2000 operating hours
C = Don’t stop function, can be bypassed	K = 3000 operating hours
D = Seldom break, long time production	L = 4000 operating hours
E = 100 operating hours	M = 5000 operating hours
F = 250 operating hours	N = 6000 operating hours
G = 500 operating hours	O = 7000 operating hours
H = 750 operating hours	P = 8000 operating hours

18) UN = Short code for measure units, eg mm, kg etc.
19) Qty = Number of items needed in the complete assembly.
